Su Phat Thong

TECHNICAL BUSINESS ANALYST

Ho Chi Minh City
March 23, 2003
070 701 7539
spthong.0323@gmail.com

PROFESSIONAL SUMMARY

Business Analyst with experience in logistics and business process optimization. Capable of analyzing operational workflows, identifying repetitive steps, and proposing automation solutions to improve work efficiency. Proficient in using AI tools for market research, data analysis, prototyping, and translating business requirements into clear Technical Specifications.

PROFESSIONAL EXPERIENCE

Documentation Operations – Logistics

02/2025 – 02/2026 (1 year)

UPS Vietnam

- Observed actual workflows, identified repetitive tasks and bottlenecks in document processing.
- Proactively analyzed processes and built support tools to optimize personal workflow.
- Handled documentation and declaration for import-export shipments, including cultural and security-related declarations. Required high precision in data verification and compliance with operational regulations.
- Verified the validity of documents and data before submission.
- Coordinated with operations departments to ensure shipment processing schedules.
- Participated in optimizing document processing workflows.

Process Optimization Initiative

Analyzed document processing workflows and identified multiple repetitive steps for optimization.
Approach: Business process analysis; Identification of repetitive tasks; Built support tools based on process analysis combined with AI-assisted development to automate part of the work.

Impact:

- Reduced individual processing time from **8 hours/day to approximately 2 hours/day**.
- Significantly reduced manual data entry and increased data accuracy.
- Leveraged remaining time to observe and understand operational workflows and business links.

PROJECTS

Note: The projects below are extraneous to primary work responsibilities.

Project 1: Market Research & Lead Discovery Automation

Business Value: Supports the sales team in accessing market data faster and improving the lead discovery process.

Built automation workflows using n8n to:

- Collect data from websites.
- Analyze competitors and research markets.
- Support lead discovery for the sales team.
- Build sets of workflows to help the sales team perform sales activities efficiently and smoothly.

Project 2: Email Automation Workflow

Acted as a **bridge between Sales and IT teams** to solve the email automation problem: gathering requirements, analyzing workflows, working with IT to propose solutions, and building an effective email automation process.

Focus: Cross-team coordination & Automation proposal.

CORE COMPETENCIES

AI Research & Market Analysis
Gemini, ChatGPT, Google LLMs

Data Analysis & Reporting
Excel, Power BI

Workflow Automation & Integration
n8n, Excel VBA, Macro Automation, Make (Integromat)

AI-Assisted Development / Vibe Coding
Antigravity, Cursor, GitHub Copilot, Codex

Data Collection & Automation
Puppeteer

UI/UX & Product Design
Figma, FigJam, Canva

Process Modeling & Workflow Diagram
Draw.io, Mermaid

Documentation & BA Artifacts
Notion, Jira, GitHub. BRD, PRD, User Story, Acceptance

EDUCATION

Ho Chi Minh City University of Transport

Bachelor of Transport Economics
2021 - 2025

STRENGTHS

- Process Optimization Mindset.
- AI-First Problem Solving.
- Automation Thinking.
- Cross-team Communication (Sales – IT).
- Process Analysis & Optimization.
- Quick learning and adaptation to new tools.
- Analytical thinking & Problem-solving.

ATTITUDE

- **Proactive:** Proactively observe processes and suggest improvements.
- **Continuous Learning:** Constantly update AI tools and new technologies.
- **Collaboration:** Effectively coordinate between Sales, IT, and Operations.
- **Efficiency Focus:** Always focus on optimizing time and processes.

LANGUAGES

- **Vietnamese:** Native
- **English:** Technical reading & comprehension
